SRC SEAT ALLOCATION FORMULA

$$Total\ no.of\ votes\ cast \div no.of\ seats$$

$$16009 \div 13 = 1231$$

The number of votes received by a party is divided by 1231 to determine the number of seats received. The party with the highest number of remaining votes below 1231 is allocated the first “hanging” seat, and the next one etc. until all seats have been allocated.
