

## Professor/Associate Professor/Senior Lecturer: Animal Production (One post)

### Requirements:

- A PhD in quantitative genetics with strong qualities in statistical genetics or biostatistics.
- Experience working with large scale genetic/genomics data and evaluation software is desirable.
- A minimum of five years' teaching, research and administrative experience at tertiary level.
- At least 10/five scholarly publications (in the case of Professor/Associate Professor respectively) in accredited journals, and membership of relevant professional bodies.
- Evidence of postgraduate students (Master and PhD) supervision.
- Evidence of the ability to establish research collaborations and raise research funds.
- Evidence of community engagement activities
- Registration with the South African Council for Natural Scientific Professions will be an added advantage.

### Duties:

The successful candidate will be expected to:

- Teach the quantitative genetics (with strong emphasis on statistical genetics or biostatistics) modules at undergraduate and postgraduate levels.
- Supervise postgraduate students on your own funded research projects.
- Attend and read conference papers and publish in subsidy earning conference proceeding, journal and/or books.
- Participate in departmental research and third stream income generating projects.
- Develop funded proposal for community engagement project and participate in departmental existing projects.
- Perform administrative and managerial duties as allocated by the Head of the Department.
