#ChooseUL

TGSL 1st Global Leadership & Sustainability Symposium

**Theme: Innovation, Climate Change
Management & Energy Transition**

Venue: TGSL Edupark and Online

Date: 16 October 2025

Time: 08:30 - 16:30

Background

Climate change endangers livelihoods, development, and environmental sustainability prompting a global move toward low-carbon energy. The transition to sustainable energy brings complex opportunities and challenges, especially in communities dependent on carbon-intensive industries. However, an inclusive energy transition requires that technological and institutional innovations operate within the principles of distributive, procedural, and restorative justice. This symposium on "Innovation, Climate Change Management & Energy Transition" explores how societal transformations, governmental frameworks, and technological advances may create an inclusive and sustainable future.

Objectives

- To foster knowledge exchange, promote collaboration, and inspire action among stakeholders from diverse sectors.
- To strengthen partnerships among academia, government, business, and civil society in driving inclusive climate and energy strategies.

Key Themes of the Symposium

- Innovation in Climate Change Mitigation and Adaptation
- Energy Technologies & Just Energy Transition

Target Audience:

- Government and Private Institutions
- Researchers, Academics and Students
- Civil society organizations, and industry representatives (both local & international)

Symposium Format:

Keynote speeches, panel discussions, paper presentations, poster presentations and interactive sessions in hybrid format.

Expected Outcomes:

- Increased awareness on climate change, and energy transition while strengthening stakeholders' collaboration.
- Development of concrete recommendations for policymakers and other stakeholders.
- Publication of a journal special issue.
