

**Kgabo Ntlatleng, MRM HOD:
ARM Bokoni Platinum Mines**

A geologist in the Mining value chain and rewiring to align with dynamic industry needs

I have over 20 years of extensive experience in the mining industry, encompassing coal, manganese, and platinum group metals. I have held senior management positions for more than a decade. This tenure has demonstrated my expertise in various mining methods and organizational leadership. Currently, I lead the Mineral Resource Management Department at ARM Bokoni

Platinum Mines, engaging with multiple stakeholders and contributing to strategic decisions and direction.

Prior to this role, I have served as a Mineral Resources Manager at ARM/ Assmang Manganese: Black Rock Mining Operations for four years and as a Senior Manager of Business Planning at Sasol Mining, Bosjesspruit Colliery for three years. My middle management positions included roles such as Senior Specialist in Business Analysis within the Strategy and New Business Development Department at Sasol Mining, where I was responsible for ensuring a robust strategy for Sasol Mining up to 2050. I have also served as Chief Geologist, declaring resources as per SAMREC standards and leading the geology department while being part of the Colliery management team.

In addition to this extensive professional experience, I have the following qualifications: BSc Geology, BSc Hons Geology, GDE Mining Engineering, MBA. I am currently enhancing my governance knowledge through the Institute of Directors South Africa Certified Director Designation program. This program has proven to be valuable in my current role at Bokoni and is preparing me for future leadership roles in various economic sectors. Recently, I have been appointed as a member of the SAIMM CPD Committee, which deals with strategies that I am highly passionate about talent development for the South African Mining Industry.
